Education

Vellore Institute of Technology

B.Tech in Computer Science and Engineering **CGPA: 9.11**

Professional Summary

- Software Engineer with a strong foundation in Python, Java, and C++, and a 9.11 CGPA in Computer Science.
- Experienced in bridging the gap between engineering and business by architecting scalable APIs, fine-tuning LLM pipelines, and delivering real-time user analytics.
- Proven track record in stakeholder management and technical consulting, having led cross-functional efforts to align AI features with business objectives.

Relevant Coursework

Data Structures	Database Management	Artificial Intelligence	Operating Systems
Computer Networks	Machine Learning	Cloud Computing	Computer Architecture

Experience

AI Engineer Intern – Amasqis.ai

Apr 2025 – Sept 2025

- **Technical Consulting:** Architected scalable APIs for real-time analytics, serving as a technical bridge to deliver next-gen banking solutions and enhance customer engagement.
- **Data-Driven Decision Making:** Diagnosed complex data patterns for green hydrogen forecasting, improving prediction accuracy by 15%.
- **Documentation & Advocacy:** Visualized research contributions and authored internal whitepapers to ensure technical concepts were accessible to non-technical stakeholders.

Product Intern at CeeQ

Dec 2024 – Feb 2025

- **Cross-functional Leadership:** Collaborated with design, recruitment, and leadership teams to restructure content strategies and optimize audience reach.
- **Standardization:** Developed and validated a social media handbook in partnership with the Founder to ensure brand consistency and operational scalability.

Projects

Tawjihi.ai | React, Python, FastAPI, TensorFlow, PostgreSQL, AWS

- **System Design:** Re-engineered LLM pipelines and fine-tuned models on transaction data, increasing recommendation accuracy by 27%.
- **Partner Support:** Developed and validated scalable REST APIs for 500+ active users, ensuring compliance with financial standards and high availability.
- **Stakeholder Alignment:** Worked cross-functionally with product leads to ensure AI features met business objectives and supported timely product releases.

CAPE | React, Node.js, Astro, Chart.js, MongoDB, SQL, Python

[View link](#)

- Architected and implemented an online examination management dashboard with modules for statistics, student info, and study materials.
- Implemented and visualized a subject-filtered study materials section, optimizing user navigation and engagement.
- CAPE stands for the Comprehensive Assessment Platform for Education
- Restructured layout to display student details alongside upcoming exams and automated real-time updates, boosting load efficiency by 30%.

Disability Aid | Python, OpenCV, MediaPipe, TensorFlow, Machine Learning

- Addressed the communication gap faced by hearing-impaired users by building a real-time ISL gesture-to-text system.
- Solved accuracy and environment issues (lighting, background noise) by replacing pixel-based CNNs with MediaPipe skeletal tracking and creating a custom 90-point interpolation engine for richer gesture geometry.
- Solved performance and hardware limitations by deploying a lightweight TFLite neural network running entirely on CPU at 35–40 FPS, removing the need for GPUs.
- Enabled dynamic gesture recognition (not just static alphabets) through custom dataset creation and optimized feature engineering

IVerify | Python, Automation Scripts, Excel Processing, PDF Generation

[**View link**](#)

- Coded, automated, and tested scripts to process multiple Excel sheets and consolidate data for reporting.
- Engineered PDF generation modules to produce individual profiles, ensuring data accuracy and format compatibility.
- Validated output across formats and strengthened data accessibility for end-users.

Technical Skills

Languages: C++, Java, Python, JavaScript, Swift

Developer Tools: VS Code, Google Cloud Platform, Android Studio

Technologies/Frameworks: HTML, CSS, React, Next.js, Tailwind CSS, Node.js, Express, MySQL, MongoDB, OpenAPI, AWS, DevOps, PyTorch, Security frameworks

Security & Compliance: Encryption/KMS, IAM, and Access Control.

Other Skills: Solution-oriented, Public Speaking, Collaborative Thinking, Adaptability, Time Management, Solution-oriented architecture, Technical Project Management, Stakeholder Management, Root Cause Analysis

Achievements

- President of [Cisco Community VIT Bhopal](#)
- Solved over **300+ DSA problems** on [Leetcode](#)
- Represented my **School at the State Level** in debate and sports
- Scored over **40+ coding points** on [GeeksforGeeks](#), having a rating of **1600+**.
- Scored **8000+** points on [Google Cloud](#)
- Secured a place in the **top 30** at the SIH university level.
- Contributed to **Open Source** in Hacktoberfest.
- Completed **30 days of Google Arcade**
- **State Level Athlete**
- Level **12** in Japanese, which is equivalent to **N4, N5**
